## NEW SCHOLARSHIP

By Sandy Lamar

A new scholarship fund for Embry-Riddle students is being established by Mr. and Mrs. Lawrence Vagnozzi in memory of their son, Richard. Richard, who was killed recently in an automobile accident, was enrolled in the Engineering and Pro-pilot programs at Embry-Riddle in 1968 and 1969.

The Richard Vagnozzi Memorial Scholarship Fund will be available to help needy students attend Riddle. Money for the fund will come initially from the sale of his personal property. There will be a garage sale for this purpose on August 7 and 8 from 9:00 - 5:00 at 102 Pine Crest, Ormond Beach. Following the garage sale, the Veterans' Association has offered its assistance in selling such items as clothes, books, records, and other items to help students set up apartment living in town. The Veterans expect the on-campus sale to coincide with the efforts of the Used Bookstore in the early Fall. Interested students, faculty, and staff are encouraged to support the scholarship fund by attending one or both of these sales.

Enrollment for Summer Term B is up 44 percent over last year at ERAU with 1,246 students on campus, according to Dr. George E. Pence, Dean of Registration and Student Records. The biggest number of students -- 787 -- are enrolled in the university's academic programs. That represents a 33 percent increase over the 593 academic students for the second term last Summer.

Maintenance technology students showed a 60 percent increase from last Summer's 158 to the current 253. There are 206 flight technology students, a 77 percent increase over the 116 enrolled for Summer Term B last year.

Embry-Riddle's academic year is divided into three trimesters with the Summer trimester broken up into two terms. Graduation for both Summer Term A and B will be August 21.

## Notice

Embry-Riddle's "Lost and Found" department has been moved to the Secretary, Dean of Student Affairs, office, which is located in the University Center, across the hall from the bookstore.

Should the secretary happen to be out at the time you visit the office, please leave a note at the switchboard (front-desk receptionist) containing the following information:

- Your name
  - How to get in contact with you (phone no., ERAU Box no., etc.)
  - Description of the article you have either lost or found
- Thanks for your cooperation!

## NEW MEMBERS FOR ODK

In order to recognize the outstanding students at Embry-Riddle, Omicron Delta Kappa, National Leadership Honor Society, is organizing the nomination and election for new members. The society believes that progressive and intelligent development in campus citizenship requires the students to engage in purposeful activities which can be aided by the friendly counsel and association with the faculty. The five indispensable qualifications for membership are: Exemplary character, responsible leadership, and consecration to democratic ideals. Below follows the criteria for selection, and the Honor Schedule.

### MINIMUM CRITERIA

1. Juniors and Seniors (minimum of 30 hours at Embry-Riddle)
2. Grade point average of 3.0 or better
3. Demonstration of exemplary character
4. Quality leadership in at least one major position with sufficient number of points in other groups to mark him with distinction. (See the Honor Schedule for groups)

### HONOR SCHEDULE

1. Scholarship
2. Athletics
3. Student Government, Social, and Religious Affairs
4. Publications
5. Speech, Music, Drama, and Other Arts

The potential member will be receiving a tapping letter in their mail box in the near future with further information.

## COMSTAR LAUNCH SCHED JULY 22

KENNEDY SPACE CENTER, Fla. - The launch of Comstar D-2, the second in a series of domestic communications satellites of COMSAT General Corporation, will be launched July 22.

Comstar D-2 will be launched on an Atlas-Centaur booster from Complex 36, Cape Canaveral, during a window extending from 6:04 to 7:13 p.m. EDT.

Those desiring to cover the launch from Press Site 1 on July 22 will be bused at Frank Wolfe's Beachside Motel (formerly the Ramada Inn), Cocoa Beach. No government transportation will be provided. Privately owned vehicles will travel to the Press Site in convoy under escort. The convoy will depart Frank Wolfe's at 4:30 p.m. Others may join the convoy at 4:45 p.m. at the Gate 1 Pass and Identification Building, Cape Canaveral Air Force Station.

## WHO'S WHO IN CO-OP

By Warren Mesner

Cooperative Education is one of the fastest growing student programs on campus. Critical to the success of the program are the Co-op Faculty Advisors. As an academic program within the academic structure where credits are given to students who co-op, faculty support is essential.

The program is fortunate in having the services of the following dedicated faculty:

Dr. Howard Curtis  
Engineering  
Anthony DiGirolamo  
Flight  
Rudy Knabe  
Management  
Walter Prettyman  
Maintenance

Students in each area will recognize these names and should feel free to contact these gentlemen regarding the Co-op program.

Special recognition is made of Myron Bales for his services as the Management Advisor under his recent illness. He is sorely missed by all of us.

Briefly, the Co-op Faculty Advisors assist the Director in locating students for various co-op jobs, pre-screening them, and

Dr. Howard Curtis

Anthony DiGirolamo

Rudy Knabe

Walter Prettyman

evaluating their co-op work efforts for grading purposes. They perform the function of determining course credits for co-op work assignments, a necessary function to insure continued quality of Embry-Riddle degree programs.

You'll find the team of Co-op staff and Faculty Advisors interested in you and assisting you in your career goals. See them, their message is important for you and your future.

COOPERATIVE EDUCATION  
CO-OP JOB  
FALL TRIMESTER '76/Deadline to complete application - JULY 23, 1976

CROW, INC. - Piper Aircraft Dealer, Swanton, Ohio  
Job: A & P mechanic, possible work in a technical area as work load increases  
Wage Rate: \$3.50/hr.  
See: Mr. Warren Mesner, Director, Cooperative Education, GRW L202, Ext. 427

\*\*\*A limited number of July through August calendars are available at the switchboard area. Please correct your calendars if you've already picked them up.

\*\*\*On Thursday, July 22, students desiring food service should be sure to check their mailboxes to find out the change in the normal schedule, due to the Committee of 100 meeting in the University Center Dining Area.

LETTERS APPEARING IN THE AVION DO NOT NECESSARILY REFLECT THE OPINIONS OF THIS NEWSPAPER OR ITS STAFF.

## EDITORIAL

Welcome to the Early Birds. How do you like the great Florida weather? Thirsty? Just breathe in!

The trees are great. But my priorities differ a bit, as do those of many others. I'm sure. How about fixing the air conditioning, and getting all the clocks on campus within five minutes of each other? It sure would improve the learning environment!

After much persuasion, I'd like to wish my secretary a happy birthday. I urge everyone who knows her, and even those who don't, to poke their heads into the Avion office and wish her a happy birthday. Thanks.

Dear J.W.,

I received your letter. However, I missed the point. Do you want it printed? I'm afraid I couldn't do that. Plus, your allegations may or may not be true; it is neither any of my business nor of any interest to me. I don't feel my integrity has been downgraded, but it seems you've attempted to downgrade someone else's. My question is why? I'd appreciate your reply. Thanks for your interest.

*Jeffrey M. Rubin*

By Dave Fraser

I would like to welcome all the new Earlybird students to Fort Riddle. I'm sure all of you are quickly discovering the negative elements associated with Embry-Riddle. All of you feel like I did the first few weeks during my freshman year. I hope you will stick around long enough to let the positive aspects of this school outweigh the disadvantages.

All I thought about my first trimester was an experience I witnessed while moving into the dorm. The literature sent out to prospective students describing the utopia-like atmosphere of Embry-Riddle came to mind while overhearing a conversation between Mrs. Woods, the desk lady in the dorm and a freshman moving in. His anxious parents were along to help him get settled after their 1,100 mile trip down here.

After he gave her his name, Mrs. Woods said, "Oh, you're in Nightfall!"

"Great!" exclaimed the enthusiastic student. "What floor is that on?"

"Why that's on Ridgewood," replied Mrs. Woods, and after she explained what and where Ridgewood was, he explained that he lacked a car. While his parents tuned into the conversation even closer, Mrs. Woods sympathetically listened. I never saw them again.

What I'm trying to get at, is that Riddle has everything in the world to offer to young aviation minded students. I wouldn't be here today if the advantages of attending this school didn't vastly outweigh the disadvantages. It will undoubtedly take the beginning student time to see, but I foresee a degree from the school meaning much more in the aviation industry. Someday, Riddle will be a well known name in the field, and will carry a considerable amount of weight while persuading prospective employers. I am thankful that we have a most-dedicated faculty, administration,

and last but surely not least, the trustees - whose financial assistance helps keep our tuition down.

It's strange that the students here are constantly going against the grain with the administration. For example, why does President Hunt want to terminate the "Planning and Development" committee here? It seems that they think the job is done now that the Maintenance Tech. building is being constructed. Apparently they see no need to physically expand anymore. I think it would be rather interesting to have them meet the large entering freshmen class students and their parents this fall when they arrive, expecting to move into the dorm.

As for the students, there are many organizations on campus, and I can't believe there are beginning students that are not interested in any of these. That is what kept me here. I'm sure it has the potential to keep many more here. I stress the importance of getting involved and giving the organizations around campus a try.

I had a pretty decent time at the TGIF last Friday, and was pleased with the turnout. I enjoyed the touch of nostalgia brought on by the Beatles flick before "Easy Rider". However, I understand there was a considerable amount of footage cut from the movie. Our social functions chairman, Rock, has inquired into the matter by writing the company that the SGA deals with. They advertise uncut movies and that is what we expect to get, especially when we invest a couple grand a year in business with them. To my knowledge, this is the first time that has occurred, and I trust after we get a satisfactory response from the company, it won't happen again.

This Friday the movie will be "Kelly's Heroes" at 8:45 and we will have another TGIF starting at 7:00 (free brew). That should be a good time!

Another thing that bothers me

and obviously bothers the Maintenance Tech. students is the fact that there is no preregistration for the fall MT classes, as has been the custom. This is a very simple and convenient operation for the MT students. It cuts the "red tape" involved in the usual poorly engineered fall registration.

Since the MT student already knows basically which class he must step up to, I see no reason why this practice cannot be continued. From the information that I have, this is being thwarted by the Registrar's office. I am confident that the Maintenance Tech division will continually work for this convenience for the students, so we may have some sort of satisfactory arrangement. If this isn't solved, I want to know why via a response in

the next issue from Doc Pence, because the MT students want to know and will be reading the paper very closely.

Hey, did you hear about the new flying club at Nova Aviation? It's called the "Royal Great Lakes Flying Corps" and needless to say, has a brand spanking new Great Lakes with a custom paint job.

I had a good time at a party this past Saturday night at the Ormond Beach water tower (4.3 miles north on the Granada Bridge on the beachside of A1A).

It was so good, in fact, we are going to try it again. Friday night, July 30th is the date. So, if you remember the beginning of "Jaws", where they had the ocean-side campfire, and thought to yourself, "Hey, that would be a good time," come on up!

## VP THOUGHTS

## FEEDBACK

Feedback is a biweekly feature of the Avion, featuring the questions, comments and complaints from the Suggestion Box located in the University Center reception area. Not all questions can be answered every issue, but we will try to answer as many as possible.

**NOTE:** The questions below were extracted from a long inquiry by an anonymous student. Since some of the questions were personal in nature, the student is advised to contact the individual involved. Students are reminded that "feedback" questions may be edited in an effort to enhance communications between faculty, staff, and students.

**QUESTION**  
What happened to the picnic tables that were discussed some time ago for the Maintenance Tech. area?

**ANSWER**  
Mr. Henry couldn't obtain them for at least 5 or 6 months. If interest is still shown in this matter we will ask him to try again.

Gary Gross

**QUESTION**  
Is it possible for the President or the Treasurer of the SGA to write themselves checks?

**ANSWER**  
No - under current procedures a check can be written to any vendor for services or goods rendered if the Student Government Executive Board or Student Senate has authorized the expenditure. The check is signed by the SGA Treasurer and one of three designated members of the Division of Student Affairs.

Jim Agelt

**COMPLAINT**  
The SGA office is never open when it is supposed to be.

**RESPONSE**  
The hours are posted on the door, and if the person steps out they have been instructed to leave a note on the door. If you find this isn't the case, please leave a note with the receptionist.

Gary Gross

**COMPLAINT**  
Social Functions are not published well enough on the A&P side of campus.

**RESPONSE**  
All the social events planned and carried out by the SGA Social Functions Committee are advertised a minimum of one week in advance of the event in the Avion. Posters are also placed in conspicuous places in the University Center and in the Administration Building. If a student visits either of these University facilities, or glances at the Avion once a week, he will be informed of all the social functions planned and carried out on his behalf.

Rock McClenahan

**QUESTION**  
Why does the SGA pay the Social Functions Chairman, and not other Senators?

**RESPONSE**  
Due to the lack of interest in this position, it has been the policy of the SGA to pay this chairman. The job involves a lot of after-hours work at specified times, plus a lot of setting up and cleaning up. The Senate voted unanimously to pay this position this semester.

Gary Gross

## PRESIDENT'S CORNER

By Gary Gross

We need a few students to serve on some University committees. If you have an hour or so a month and are the slightest bit interested, please stop in the office and leave your name.

The first committee (a new one) is the Student Involvement Committee of the Board of Visitors. The Board of Visitors is made up of sixty community business and professional residents of the local area. They undertake many worthwhile projects on behalf of the University. Some of the main purposes of this committee are to present to the Board of Visitors such ideas and programs that will meet the needs and objectives of the student body in areas where the board can provide assistance. They will also provide a line of communication between the student body and the Board of Visitors to meet student needs.

The second committee is the Academic Standards and Procedures Committee. It's just as important as it sounds because it makes and amends the school's academic standards and procedures.

While back the paper came close to folding because of financial reasons. When that happened, people were enraged at the thought of not having a paper. So the SGA allocated more funds to the Avion and everyone relaxed and was happy again. Now, again, the paper is about to fold because of lack of help, not funds. I ask you where are the people who yelled so loud before, and demanded that the SGA do something? Where are the concerned groups and organizations that were going to give the Avion money before but won't help now?

I'm one who will hate to see the Avion die, but if students don't care, I guess it should. I seriously doubt that the Senate will allocate any money to the paper for this fall unless they have a complete staff or aspects of one - which they are far from now.

Published weekly throughout the academic year and bi-weekly throughout the summer and distributed by THE AVION, Embry-Riddle Aeronautical University, Daytona Beach Regional Airport, Daytona Beach, Florida 32204. Phone 232-5661, extension 313. Printer subscription-\$3.00.

— John Shank —

By Doug Baldauf

As summer continues, the number of brain fade cases are increasing at epidemic proportions. Oddly, only at ERAU has this plague caused people to wander aimlessly, talk incoherently, or phase out of reality with total disregard for receiving the all important "higher" education. Not immune to this situation is the Vets Club. Can there be any relief? The only reported cure, although results are inconclusive, shows that a Budweiser brain flush will have short term remedial effects. Those seeking relief should visit Dr. John at the Large Fathers museum of drinks, derelicts, and winos (appointments not necessary). For tous, contact any of the Vets in the Used Bookstore.

Congrats to Russ Copeland, who was just voted in as a new associate member. You can normally find him either on the pinball machines, or lounging on the bar at Big Dad's. At night, he works in disguise at the Zodiac Lounge. (His stage name — Lotta Box.)

The Vets Club would like to bid a fond farewell to the following graduates:

A &amp; P

Rich Zingaro  
Dan Thurst  
Gerry Selvitella  
Vir Ganga

Graduated with the dubious honor of achieving an A.S., B.S., A.S.S., and B.M.F. in A.M.M. was John Wayne Shank, the American Dream! Asked by this reporter to comment on his achievement, he replied, "Last night I couldn't even spell A.M.M., now I are one."

## SPORTS

The Vets Club is looking for a few good men (preferably non-Marines) to do combat this fall as mercenaries in the Vets Club flag football program. Any veterans or active duty soldiers can sign up in the Used Bookstore. Our 4-man volleyball team is out to break its curse as the best second place team on campus. Led by Rick Gill, Bob Allen, Robin Donley, and Doug Baldauf, our chances look optimistically brighter than before. Good luck, guys!!

Remember, all you non-members can still enjoy two more great social functions and make a lot of good friends for only \$3.50 for the remainder of B Term. Stop by the Used Bookstore for information.

## SIGMA CHI NEWS

By Spaghetti

"Sezarc" was the name.... Brother Walt Sharpe's firewater came by the pitcher full, while a Delta Chi comedian provided the laughs at a going away party for Jerry Anderson (Fat Albert) last Friday night. Afterwards, the jollies continued in the Sigma Chi pool....enough said!

Don't forget to mark your calendar for a pool party at our house on 520 South Ridgewood on July 31. We will be supplying one keg of beer and a challenge for any other organization on campus to match this.

## RIDDLE PACKERS

By Page Edmunds

Over the 4th of July, the Riddle Packers (best club on campus) went to Yonah Mt. in Cleveland.....Georgia. Rob, Mike, and Page A. (not to be confused with Page E.) went up a day early to roust the rats and also to get an extra days climbing in. The rest of the troops, including the likes of Misty, Sue, Lorene, Rose, Brent and Page E., drove up on Friday after school. After a somewhat brief reunion at the campsite at 2:30 a.m., most of the Packers turned in for the night. LIGHTWEIGHTS!!

On Saturday, the members were exposed to several of the many climbing and safety techniques of REAL mountain climbing. The morning was spent rappelling off a 90 foot drop boulder. After a refreshing, nourishing and restful lunch, the Packers once again assaulted the mountain. This time, we divided our-

selves into two groups, one led by Rob, the other by Mike. Each group tied itself into a rope at even increments so that maximum climbing distance could be attained between members. It took the two groups about two hours to scale the mountain.

Just as the climb was coming to an end, the sky was starting to open up. Everyone got off the mountain safely, and back to camp for a well-deserved beer. After dinner, we sat around talking about the days climb, and finally dropped off by one.

We were greeted Sunday morning with rain, and more rain, and even more rain. So.....(since we can't climb safely in the rain) the Riddle Packers for the first time in their long and illustrious career as one of the leading organizations on campus packed it up and came home to the secure confines of the World's Most Famous Beach.

By Jim Burroughs

Quad A elections were held recently and the following positions were filled:

Bill Hardy - President  
Bob White - VP Programs  
Mike McDuffie - VP Athletics

Saturday evening the ladies fixed up lots of good food and took the members out to the Battleship. The guys kept raving about the food. Most went back for thirds. General consensus is that the party was a bust.

Mike Hams and Steve Nash received silver cups for having helped bring us two new associate members. We also want to thank their wives for all the help and assistance they gave to the project.

## ALUMNI NEWS

Miami Graduate Center Students

The American Tobacco Company used to advertise that their market would "Walk a Mile For a Camel". Well, they have nothing on the ERAU Graduate Center. One of their students drove 256 miles for a graduate course. (MS625 - Airline Marketing Management - Wednesday evenings from 6 - 10 pm, taught by Mr. Peter Murray, Mgr. Market Planning for Eastern Airlines).

Peter Wilson, who received his undergraduate degree from Embury-Riddle in December 1975, has enrolled in the Master's of Aviation Management program at the Miami Graduate Center.

Pete is currently employed as a proof reader for the Daytona Beach News Journal and commutes between Daytona and Miami.

In addition to his academic work, Pete is also working on his CFI, so that when he enrolls as a full time student, he will be able to work building his flight time and earn his Master's degree at the same time.

## EATEATEATEATEATEATEAT

By Ray Cardellino

It is the humble purpose of this column to publicize places to eat in and around Daytona. This publicity can go at least two ways. If a place offers well prepared, clean wholesome food in an attractive or at least, non-offensive atmosphere, then it gets good publicity and our personal recommendation that you check it out. On the other hand, when we encounter a business in the culinary arts, we'll make them wish, hopefully, that they did invest the insurance money in that gift shop on A1A rather than inflict themselves on hungry people.

We'll not only critique places that offer dinner, but those where breakfast and lunch are available also.

So, if you have friends and family visiting you in scenic, metropolitan Daytona, now you'll be able to spare them the inconvenience of potomane and a needlessly depleted wallet by impressing them with your knowledge and generally gay ways.

First the bad news. If you enjoy playing with the difference between expectations and harsh reality, then the place for you is "THE SHRIMP HOUSE". Yes, friends, if you enjoy leathery, dry, overcooked seafood served in an offhand manner by people who couldn't care less, dine at "THE SHRIMP HOUSE", tonight. It's at 2128 S. Atlantic Avenue.

It's also nowhere at the same time. How interesting. We ordered the clam chowder (Manhattan style), fried seafood combination, and a bottle of Almaden white wine. We opted out of Carafe wine (rarely to be trusted). Our initial misgivings at the vinyl tables decorated with previous diners' crumbs, randomly soiled silverware (not spotted, soiled!) and a sense of mystery at who our waitress really was, were set aside when the chowder arrived. It was good! Obviously homemade. Not excellent, but good...a nice balance between clams, potatoes, celery, etc. We had to ask for crackers. A bowl of soup isn't a whole meal, however.

After some time, the seafood sneaked out of the kitchen and insinuated itself on the table. What were described as lobster tails looked to be more like painted plastic miniatures you'd find in an elaborate 18th century dollhouse. I suspect the rest of the fish was already cooked, sitting on paper toweling to drain under warming lights in the kitchen long before we sat down. I can't believe that the fish served was prepared to order. We know better.

The wine was brought to the table with the cork out! After basking in the generally depressing atmosphere of the place, watching the male cashier silently but heavily (350 lbs. at least) stalk the dining room, quietly but forcefully wishing he were a bouncer again, the decision had to be made as to whether the wine should be downed quickly to mellow things out, or hurled against the wall as a token of our esteem. In the interest of would-be peace, and avoidance of the Daytona cops, we inhaled the wine, toyed with the fish, passed on dessert and through the door. The check didn't amount to much, but considering what we got, the meal was drastically overpriced.

Into the car and away to T.J.'s for mozzarella cheese - steaks on homemade bread to satisfy the hunger that "THE SHRIMP HOUSE" couldn't, not in a million years.

Next edition, you'll find out about T.J.'s! That'll be the good news.

## DAYTONA BEACH PLANETARIUM NEWS

Due to the recent water damage, and consequent clean-up in the Planetarium, the entire Summer Schedule was totally upset and created some serious conflicts with activities which were previously planned. Because of all of these factors we do not anticipate opening the Planetarium for star shows until early September. However, we have arranged a science-space movie series which will often feature short introductory programs and lectures along with opportunities for questions and answers after the presentations. We feel that these programs will be most interesting and sincerely hope that you will assist us in "spreading the word" concerning this project of the Planetarium. The programs will all be presented at the regular planetarium show times of 3 o'clock and 7:30 pm on Wednesday, and at 7:30 pm on Friday in the Planetarium Chamber. We have selected a series which will not only be topical, but will also cover many of the most interesting and important aspects of what has happened, or will happen in space. And very importantly, all of these programs will be presented FREE to the general public. Everyone is encouraged to attend these programs.

We will be offering a different program each week throughout the rest of the Summer, starting the seventh of July until the end of August.

If you have any suggestions or have any questions, feel free to contact the Planetarium, or the Museum for more information concerning this series of programs.

JULY 21 - 23

One of the greatest of all questions seriously being pondered by the scientist today is the very real possibility that life may exist in the universe. This very interesting subject is so large that it will be the subject of this week's program and also of the following week. During the first week we will look at the probability that life in some form may exist on the surface of Mars. This is important not only because of the importance of the discovery, but also for the possibility of life in the rest of the universe. If we have two planets with life, then life may be far more common than ever suspected. And even if we do not discover life on Mars with the Viking, it does not mean that life can't exist on the Red Planet. Our movies for discussion are "Life?", "Mars - Is There Life?", and "Mars - Was There Life?".

JULY 28 - 30

Beyond the possibility of life on another planet of our solar system is the even greater chance that we are really not alone in the universe, especially in view of many recent discoveries.

We have two very interesting films which tell this story concerning the "quiet revolution" which has taken place in science which has convinced many scientists of this fact. The first of these films is called "Who's Out There?", which is narrated by Orson Wells, and the second is "Life Beyond Earth" and "The Mind of Man."

"THE HAPPY FACE PLACE"

## CESSNA ANNOUNCES NEW 1977 'SKYHAWK/100'

WICHITA, KANSAS - Cessna Aircraft Company has announced an all-new Skyhawk for 1977 that has more horsepower, more speed, greater climb performance and a higher service ceiling - yet it produces all this with LESS fuel consumption than previous models.

"The new Skyhawk/100 is so outstanding, we expect it to rapidly replace the current operating fleet of Skyhawks worldwide," said Bob Lair, Cessna senior vice president. More than 25,000 Skyhawks have been produced since the popular four-place aircraft was introduced in 1956. "Using a 160 horsepower Lycoming O-320 H engine, the Skyhawk/100 meets the needs of today's general aviation environment without sacrificing fuel economy and performance," said Lair. "In fact, the engine gives the Skyhawk/100 ten additional horsepower, a two knot increase in cruise speed and a five percent improvement in fuel consumption."

The Skyhawk/100 cruises at 122 knots (141 mph), using 75 percent power at 8000 feet. Rate of climb is up dramatically to 770 feet per minute (up from 645 fpm) at sea level and the service ceiling is 14,200 feet, an increase of 1100 feet. The new airplane will clear a 50-foot obstacle in 1440 feet, an improvement of 85 feet over previous Skyhawks.

The new, modern engine in the Skyhawk/100 is designed to use the readily available 100 octane aviation fuel," Lair said. The popular "II" avionics package for VFR functions and the Nav Pac for IFR-equipped airplanes will continue to be offered on the new Skyhawk/100.

The new airplane will feature a number of significant additional improvements. A new instrument panel cover increases rigidity and improves appearance and instrument visibility by reducing edge shadow, especially during night operation. A redesigned lower panel of energy absorbing collapsible structure provides added leg protection and gives a neat, finished look to the engine panel.

Two "high performance" airplane features - a pre-select flap control and a vernier mixture control, add to the Skyhawk/100's operational simplicity. The pre-select flap lever provides an infinite number of settings with detents at the commonly used 10°, 20°, and 40° positions. A vernier mixture control is standard, providing easier selection of the best fuel-air mixtures.

A third "big airplane" feature - rudder trim - is available as an option for 1977 on the new Skyhawk/100. Located in the lower center console, the horizontally-operated lever enables the pilot to trim out rudder pressures during climb and to fine trim the aircraft during cruise.

New interior and exterior styling add to the Skyhawk/100's attractiveness with three new fabric, vinyl, or leather options in eight colors. Interiors match a distinctive, new paint scheme that features eight different accent colors on overall vestal white. Prices of the airplanes are: Skyhawk/100, \$22,300; Skyhawk II/100, \$24,990; and Skyhawk II/100 with Nav Pac, \$28,850. All prices are f.a.f., Wichita, Kansas.

## -ENGINEERS OR RESEARCHERS-

## WIN UP TO \$5000!

Awards totaling at least \$8,000 will be paid to young engineers, designers, and researchers from the U.S., Canada, and Mexico who submit winning technical papers this year on pumps and pump systems to the Henry R. Worthington North American Technical Awards Contest.

Sponsored by Polytechnic Institute of New York, the Contest is open to all North Americans. The papers, which must be previously unpublished, may be written in English, Spanish, or French. Authors or authors may be affiliated with a college or university, a consulting engineering firm, a pump user, or a pump or pump system manufacturer.

## First Time in North America

Worthington Pump, Inc., with headquarters in Mountainside, N.J., is supporting the awards contest in North America for the first time this year as part of its observance of the nation's Bicentennial.

Henry Rossiter Worthington (1817 - 1880), American inventor/engineer, started a pump manufacturing operation in Brooklyn in 1840 which has become the world's largest pump company. He was also a founder of the Brooklyn college known today as Polytechnic Institute of New York. It is presently the technological university with the largest engineering enrollment in New York State.

Interestingly, a technical awards contest honoring this American engineer first began in Italy. The Worthington European Technical Award is held every two years, attracting technical papers from throughout the Continent and England.

L. J. Topp, president of Worthington Pump, Inc., said the aim of the North American Contest, planned as a biennial event, is primarily to stimulate applied research and technological progress by young engineers and technical experts in the field of pumps and pump systems. It is expected, Mr. Topp said, that papers prepared by American contestants will contribute to improvements in design, performance, operation, and maintenance of pumps and pump systems of all types, as has been the case in Europe.

## Top Award \$5,000

A panel of six judges, representing institutions in Mexico, Canada, and the United States, will determine the award-winning papers. The paper winning first place in the Contest will be awarded \$5,000. Second prize is \$2,000 and third prize is \$1,000. In addition, the judges may select other outstanding papers for \$500 awards.

Deadline for registration by authors is September 1, 1976. Complete papers must be submitted by December 31, 1976.

Winners will be notified in March, 1977, and an awards dinner will be held shortly thereafter in New York City. Leading educators, scientists, engineers, industrialists, public officials, and editors will be invited to attend the awards dinner. Travel expenses for top winners to the awards dinner will be paid. Worthington will publish winning papers as a collection in book form.

## Subject Area Wide

The special problems confronted in this Bicentennial year, Mr. Topp said, offer opportunities for new solutions in the areas of energy conservation, improved reliability, and cost reductions in pumps and pumping systems.

The papers can cover aspects of pump construction from basic design to materials of construction, from fluid movement theories to methods for increasing pump life. Of particular importance at this time are solutions to such problems as sewage handling and water supplies where pumps figure prominently. Development of low-cost pumps and pump systems for developing nations is also of urgent concern.

For registration forms and detailed information, including a list of judges, write to Professor Richard S. Thorsen, Secretary, Henry R. Worthington Technical Awards, Polytechnic Institute of New York, 353 Jay Street, Brooklyn, New York 11201.

Henry R. Worthington, pioneer American inventor and industrialist who founded one of the world's leading pump manufacturing companies in 1840, will be honored by a technical awards contest sponsored in North America by Polytechnic Institute of New York, which Worthington helped establish in 1945. Prizes of \$5,000, \$2,000, and \$1,000 will be awarded for the best technical papers on pumps and pump systems.

## CAREER PLANNING AND STUDENT PLACEMENT

By Barbara Ahouse Lyons  
UTILIZING YOUR CAREER PLANNING AND PLACEMENT CENTER — EARLY ON!

Visiting and utilizing the services and resources of the center can give you decided advantages over other students as it gives you the opportunity to learn about the functions of the office; services offered; salary and employment trends; and resources available. Also, it gives us the opportunity to know you; your interests and your qualifications.

The Career Planning and Placement Center can assist you in your search for parttime employment — both on and off campus. Assistance is given to student wives, also. If you are interested in securing part time employment, complete an application and talk with Kathy Ellis, Student Employment Clerk.

As you continue at ERAU and progress to your goal(s) of attaining a degree, flight ratings, and/or Airframe and Powerplant licenses keep in touch with the staff; ask questions; research the employment opportunities listed in the office; and reference the resource materials which are available.

If you are nearing graduation you should register with the office by completing a Qualification Record. When we get job requests, these records are researched to match your interests and qualifications with the prospective employers' current requirements. Also, remember to give us sufficient lead time in preparing your resume and cover letter.

Endouts available are: THE COLLEGE PLACEMENT ANNUAL; THE GRADUATE; and AMERICA. Stop by and pick up your copy.

## ONTOLOGY

## LOVE

By Ken Jagodzinski  
"Love" and "The Guitarist Tunes Up", two pieces of poetry in motion with seemingly no likenesses — but on the other hand contemplate....(and/or enjoy)

Love bade me welcome; yet my soul drew back, guilty of dust and sin.  
But quick-eyed Love, observing me grow slack from my first entrance in,  
Drew nearer to me, sweetly questioning if I lacked anything.

"A guest," I answered, "worthy to be here."  
Love said, "You shall be he."  
I, the unkind, the ungrateful? Ah my dear, I cannot look on thee.  
Love took my hand, and smiling, did reply, "Who made the eyes but I?"

"Truth, Love, but I have married them; let my shame go where it doth deserve."  
"And know you not," says Love, "Who have the blame?"  
"My dear, then I will serve."  
"You must sit down," says Love, "and taste my meat."  
So I did sit and eat.

— George Herbert (1593-1633)

God is love or love is God?

THE GUITARIST TUNES UP

With what attentive courtesy he bent  
Over his instrument;  
Not as a lonely connoisseur who could  
Command both wire and wood,  
But as a man with a loved woman  
might.

Inquiring with delight  
What slight essential things she had  
to say  
Before they started, he and she, to play.

— Frances Cornford (1886-1960)

Explore the comparison. Guitarist or lovers or both?

'65 HONDA 160 - good condition. 25 miles to the gallon. Engine rebuilt Elec. start. Asking \$195. Contact Steve Box 4254 Many extra parts.

# NOVA FLITE CENTER

## THE GREAT ESCAPE!

Wondering what to do this weekend?

An island not far from Daytona Beach is Grand Bahama Island, with it's own distinctive Bahamian charm. Freeport is on Grand Bahama Island, a long slender tropical haven, ringed by white sandy beaches.

From the air...on your brief hour and 45 minute flight...the waters are colored in a medley of blues and greens: turquoise, azure, emerald, sapphire, and aquamarine.

Once you arrive in Freeport, spend the evening at the El Casino as a spectator, or placing your chips on the spin of the roulette wheel, the roll of the dice, or the flip of the cards!

The next morning - hit the whitest, cleanest, most beautiful beaches you've ever seen, for skin diving in the clearest waters known. This is all available to you because you are a pilot...use that pilot's license to escape!

HOW? By taking our Piper Cherokee Six, which will carry you and your five friends there in unparalleled comfort at 160 mph. TOTAL cost approximates \$27.00 per person ROUND TRIP! We have all the necessary items: Declaration forms, charts, flotation equipment, and travel tips to make your flight a memorable one.

## The new Piper SENECA II (Full IFR available)

## Nova Flite offers you a Get Acquainted Special!:

1 hour dual in the Trainer and 1/2 hour dual in the Warrior

\$25.00

Why face the dorm this weekend? Call us to schedule a check-out, and sign up for YOUR great escape!
